

MADISON FAMILY MEDICINE RESIDENCY

Welcome to the Madison Residency Program!

Our mission:

- Cultivate physician leaders from a variety of backgrounds by fostering professional and personal growth.
- Teach full-spectrum family medicine and community health with evidence-based, collaborative, and innovative approaches.
- Serve the healthcare needs of diverse patient populations and communities in Wisconsin and beyond.

Camille Gonzalez, MD, Jenny Ho, DO, Brad Pfeifer, MD, and Alex Hanna, MD - Verona Clinic Residents

Program/Curriculum Highlights

- A dedicated patient panel for three years in a family medicine center where the priority is family-centered, collaborative evidence-based care.
- A focus on diversity with a Diversity, Equity and Inclusion committee, resident seminars, microaggression training and racial caucusing.
- An integrated focus on all aspects of behavioral health in line with the patient-centered medical home: residents have direct access to brief intervention and therapy services within the clinic, and receive training in patient-centered communication.
- Programming designed to enhance understanding of community and population health, including core competencies in public health, community engagement, and critical thinking.
- Sustained commitment to prepare residents to practice pregnancy care. All residents manage their own obstetrics patients from their continuity practice.
- Robust experiences in critical care medicine.
- Solid pediatrics experience with opportunities to manage care in a variety of outpatient and community and university hospital settings.
- Resident-led teams with opportunities to teach medical students, junior residents, and faculty colleagues in multiple settings.
- The Rural Health Equity Track offers two residents per year an unique experience in community health, leadership, and advocacy that emphasizes health disparities specific to rural populations.
- A partnership system that pairs first-year residents for some inpatient rotations, their community health rotation, and in their continuity clinic.
- A resident wellness and self-care curriculum (Aware Medicine) is integrated throughout the three-year experience, along with time allocated for regular resident "check-in" groups led by UW Mindfulness Program instructors, Resiliency Training and Balint Groups.
- Protected afternoons for resident seminar series, including hands-on workshops, didactic lectures, and self-care sessions.
- Dedication to resident professional development through close mentor/mentee relationships, scholarship opportunities, and guided personal reflection.
- A wide array of electives including optional "Pathways" that allow residents to gain in-depth experience, knowledge, and skills in specific areas of interest.
- Opportunities to write for publication and to do research with NIH-funded researchers.

Madison program director Tom Hahn, MD, and associate program director Lash Yogendran, MD, with Madison residents.

Community Highlights

A vibrant city situated between two lakes, Madison is Wisconsin's capital and home of the University of Wisconsin–Madison. Madison boasts a lively music scene, a stunning arts complex, diverse restaurants, and an energetic intellectual and political climate. Madisonians are also never more than 20 minutes from the countryside, where recreational opportunities abound. To learn more, visit <http://www.cityofmadison.com>.

Faculty and Residents

Our faculty are a talented, dynamic group of academic family medicine educators and clinicians who are complemented by fellows and community family physicians. They are nationally recognized in the areas of research, integrative health, international health, sports medicine, addiction medicine, and more. Our residents come to the program from diverse backgrounds and an array of educational and life experiences.

Hospitals

Our program offers residents an exceptional balance between community and academic environments. Rotations are primarily at St. Mary's Hospital, an outstanding regional medical center where our residents are the only house staff. Residents also rotate at the University of Wisconsin Hospital and Clinics on our family medicine service and at the American Family Children's Hospital on the pediatrics service.

"I could not have asked for a better residency program, I feel incredibly prepared to start my practice. What truly sets Madison apart are the people. DFMCH has the most compassionate, driven, and intelligent group of people from clinic and residency staff to residents and attendings."

– Allison Jenness, MD (2021 Graduate)

BELLEVILLE –

12 residents (4 per year)

- Rural practice in the small community of Belleville, located 19 miles from Madison.
- Only medical practice in town, serving a large number of geriatric patients as well as a growing younger population.

NORTHEAST –

12 residents (4 per year)

- Located in an urban neighborhood serving a socially and economically diverse patient population.
- Close coordination with neighborhood, city, county and state health, social service, and education agencies.

VERONA –

12 residents (4 per year)

- Suburban/Rural practice in a growing community southwest of Madison serving young families and an elderly population.
- Number of small industries in the area provides residents with experience in minor trauma and other work injuries.

WINGRA –

12 residents (4 per year)

- Urban, practice in the heart of Madison serving a racially and ethnically mixed community on Madison's south side.
- Large Spanish-speaking population and strong community connections.

Medical Student Rotations

- Medical student rotations are currently available to UW SMPH medical students only. These rotations are available at our residency teaching clinics and/or on our inpatient family medicine teaching services. For more information, contact Nicole Watson at nicole.watson@fammed.wisc.edu.

JULY 2023

BARABOO RURAL TRAINING TRACK

Welcome

Welcome to the Baraboo Rural Training Track, where we offer unopposed, full-spectrum family medicine training in a close-knit community. Our flexible, longitudinal curriculum places an emphasis on lifelong learning in an apprenticeship model. Founded in 1996, the Baraboo program offers unique challenges and rewards to physicians committed to serving rural communities.

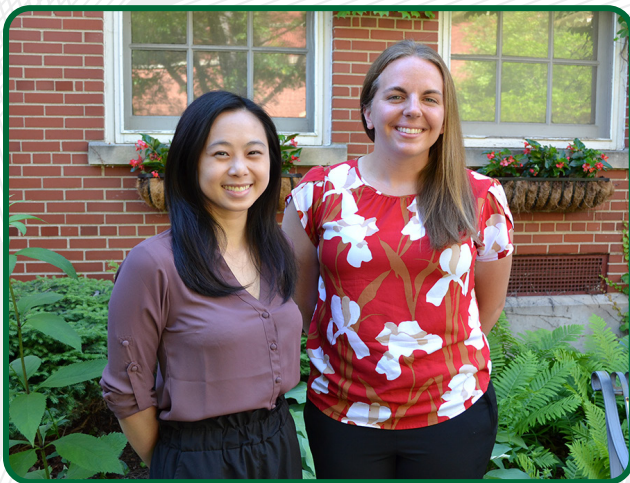

Interested? Visit our website for more information at: <http://www.fammed.wisc.edu/residency/baraboo>.

Alumnus Matt Herbst, MD participates in Community Health

Program/Curriculum Highlights

- **Procedural training** in clinic and hospital settings, with the option to carry a procedure pager for additional experiences with the hospitalists, general surgeons and the emergency physicians.
- **Unopposed, high risk, maternity care training**, from prenatal to postnatal, taught by family physicians with a supportive OB/GYN. We also offer an optional C-section curriculum to qualified residents at the discretion of the teaching general surgeon.
- **Addiction medicine curriculum** to gain robust experience with medication assisted therapy for patients struggling with the disease of addiction, including buprenorphine in pregnancy.
- **Osteopathic recognition** allowing DO residents OMT specific clinic and dedicated faculty supervision and mentorship.
- **Community health curriculum** to gain grounded experience with rotations at a local free clinic and the Ho Chunk Tribal Wellness Center.
- Opportunity to be a **leader in global health** efforts by participating in an elective global health pathway and international rotation.
- Needs-based **flexible curriculum** that allows you to tailor your educational goals to align with future practice requirements.
- **Rural physician retention**; 74% of Baraboo graduates continue to practice in the rural United States.
- **Osteopathic Recognition** achieved in 2015 and remains current.
- The **"best of both worlds"** with access to curriculum resources locally as well as those offered by the Madison program.
- **Full spectrum family medicine training** during PGY2/PGY3 in which you are taught in an apprenticeship model.
- Combined **Hospitalist and Traditionalist** model at St. Clare Hospital where you will acquire the skills necessary to admit, round on, care for and handoff hospitalized patients.
- Your clinical training site, SSM Health Dean Medical Group - Baraboo Primary Care, is located on the same campus as St. Clare Hospital and Dean Baraboo Specialty Clinic. Much of your training will occur within walking distance of your continuity clinic!

Interns Isheng Hou, MD, and Ali Howen, MD

Community Highlights

Located 45 minutes northwest of Madison in beautiful, recreational south-central Wisconsin, Baraboo is home to 12,000 people. The town's many turn-of-the-century homes, built on hillsides, are reminiscent of New England. St. Clare hospital is situated atop a hill offering a breathtaking view of the ancient, majestic bluffs which wrap around Devil's Lake. Downtown Baraboo, referred to as "the square," offers several specialty stores, gift shops, restaurants and art galleries. The square is also home to summer concerts and farmer's markets.

The surrounding area offers many points of interest and recreation, including:

- Devil's Lake State Park, which features cross-country skiing, swimming, canoeing, kayaking, fishing, camping, rock climbing, hiking and biking
- Devil's Head and Cascade Mountain downhill ski areas
- The world-renowned Circus World Museum, home of the Ringling Brothers
- International Crane Foundation
- Wisconsin Dells and Lake Wisconsin vacation areas

Hospital

As a first-year resident, you'll complete inpatient rotations at St. Mary's Hospital, Meriter, University of Wisconsin Hospital and Clinics and American Family Children's Hospital in Madison. During your second and third years, you'll be immersed in the rural full-spectrum family medicine experience by serving the resident and traditionalist panel of continuity clinic patients, taking call, performing surgeries, admitting patients, providing maternity care, rounding on nursing home patients and working in the ER at St. Clare Hospital in Baraboo.

Family Medicine Practice

SSM Health Dean Medical Group - Baraboo Primary Care is the ambulatory training site of the Baraboo Family Medicine RTT. The faculty consists of 12 Family Medicine physicians, 4 of whom are graduates of the Baraboo RTT. In addition to family medicine physicians, the site is home to a pediatrician, internal medicine physicians, and mid-level primary care providers.

Alumnus Jeff Daniels, MD, Lumbar Puncture Workshop

Medical Student Rotations

Medical students interested in a future career in rural family practice should consider participating in a rotation at the Baraboo RTT. We accept fourth-year medical students for elective rotations during the months of June, August, September and October. For further information, please contact please contact Nicole Watson at: nicole.watson@fammed.wisc.edu.

JULY 2023

MONROE FAMILY MEDICINE RESIDENCY

Welcome to the Monroe Residency Program!

Our mission:

The Monroe Family Medicine Residency Program is committed to providing compassionate and comprehensive rural osteopathic primary care training that is rigorous and is personally fulfilling to the residents who train here.

SSM Health Monroe Hospital

Program/Curriculum Highlights

- A dedicated patient panel for three years in a family medicine center where the priority is family-centered, collaborative evidence-based care.
- Osteopathic focused program since its inception with strong OMT Clinic Volumes.
- Access to Emergency Medicine Fellowship resources including didactics and procedural training.
- Collaboration with rural pharmacy residency program including shared didactics and education.
- On site simulation lab with high fidelity manikins and procedural manikins to support your learning.
- Strong partnership with Midwestern University to offer osteopathic training and resources in support of faculty and residents.

Monroe resident retreat 2022

The rural training environment allowed me to form excellent mentor/mentee relationships with my attendings. Because of these reasons, I have elected to stay on at SSM Monroe as an attending. I am so grateful to have trained here and know I would not have excelled as much in a more urban environment."

–Joy Ryland, DO (2021 Graduate)

Community Highlights

The Monroe area is continuously changing and has so much to offer. Monroe, Wisconsin and the surrounding area offer many beautiful parks and trails, an active arts community, distinctive retailers and diverse businesses, large and small. Like most small communities in southern Wisconsin, Monroe is known for its safety, friendliness and cleanliness. The Green County community is known for tourism, highly regarded breweries, cheesemaking, festivals, and wineries. Our fresh air and neighborly streets invite quiet evening strolls comparable to nothing urban settings have to offer. Please visit the wonderful, eventful town.

Faculty and Residents

Our faculty are a talented, experienced group of rural physicians who are supported by the resources offered by the University of Wisconsin School of Medicine and Public Health. They represent a variety of practice options including full scope family medicine, hospitalist medicine, emergency medicine, and osteopathic medicine. Our residents come to the program from diverse backgrounds and represent an array of educational and life experiences.

Hospitals

Our program offers residents the opportunity for rural immersion as residents spend all three years at SSM Monroe training. The hospital consistently receives awards for high quality patient care. Residents will spend 3-4 away rotations to compliment this experience as they benefit from higher volume OB, ICU, and inpatient pediatric experiences. Away rotations are primarily scheduled at St. Mary's Hospital alongside the University of Wisconsin residents.

The Monroe Family Medicine Residency (blue) is a partner of the UW Dept of Family Medicine and Community Health in Madison (red).

Medical Student Rotations

- Medical student rotations are currently available to medical students from LCME and AOA accredited medical schools. For more information, contact Colleen Rear at colleen.rear@ssmhealth.com.

JULY 2023

STATEWIDE OSTEOPATHIC COLLABORATIVE

The University of Wisconsin Department of Family Medicine and Community Health Statewide Osteopathic Collaborative (UW DFMCH) welcomes highly qualified candidates to all of its osteopathically recognized programs. This collaborative is made up of osteopathic educators from several academic and health care organizations whose goal is to train residents in osteopathic family medicine and osteopathic manipulative treatment. We are leading the way in osteopathic graduate medical education!

Accreditation

We are dedicated to providing some of the highest quality osteopathic medical education in the country. As national leaders in graduate medical education in osteopathic family practice and osteopathic manipulative treatment, **we received Osteopathic Recognition from the ACGME in July of 2015** as part of the inaugural group of residency programs in the country. In 2018, all of our programs successfully received 10 year continuing accreditation.

Jared Dubey, DO (Madison faculty) teaches an OMT technique during a local osteopathic study group meeting.

"After graduating medical school, I was not sure exactly how I saw Osteopathic Manual Medicine fitting into my future practice. I am extremely grateful that I matched into a program that is part of the statewide osteopathic curriculum. Not only did this give me the chance to continue to grow in my osteopathic training skills, but I also have continued to learn new techniques to optimize my training. Thanks to my faculty and preceptors I now have a clear idea of how to incorporate manipulation into my future work and I am looking forward to providing this service to my patients for years to come." – **Joseph Zbaracki, DO** (Eau Claire Graduate)

Based on post-residency graduate surveys, virtually all alumni are using OMT in their practice.

Collaborate Program Locations

The Collaborative consists of residents and faculty from sites throughout Wisconsin – **Baraboo, Eau Claire (Prevea), La Crosse (Gundersen), Madison, and Wausau (Aspirus)**. Our culturally and geographically diverse sites have well established community-based and regional referral hospitals, ensuring that you will have the broadest range of clinical cases and procedures.

Jamie Kling, DO (Baraboo faculty) table training Eau Claire residents during one of the quarterly osteopathic conferences held for Collaborative residents.

Curriculum Highlights

Osteopathic faculty and residents from **all of our statewide locations come together four times per academic year for skill-building conferences** that expand their knowledge and abilities in OPP/OMT. Each site provides ample training and opportunities for residents to incorporate OMT into their clinical practice. **Collaborative programs boast a 100% first-time pass rate on the osteopathic family medicine board exams.**

Amanda Schoenfuss, DO (Wausau faculty) demonstrates a technique with Libby Abbas, DO (La Crosse faculty).

Faculty and Residents

As a resident, you'll benefit from the expertise of outstanding teachers and mentors at each site. Clinical experiences and classroom instruction are provided by osteopathic and allopathic physicians who are nationally recognized in their respective fields. This promotes a collegial atmosphere that fosters greater clinical understanding and partnership between osteopathic residents and their allopathic counterparts.

Our residency education integrates osteopathic practices and principles into all aspects of medical care. Our graduates are highly sought after, pursuing careers in virtually all areas of family medicine.

Visit <https://www.fammed.wisc.edu/residency/osteopathic/> to learn more about us. If you want to talk to someone about the program, please contact us by e-mail: OsteoApplicants@fammed.wisc.edu. We look forward to hearing from you.

"As a former OMT fellow in medical school I was looking for a residency program that would not only support my passion for osteopathic medicine but also push me to think osteopathically and improve my OMT skills. I knew this program had a great reputation and the osteopathic and all around education I received exceeded my expectations. As a graduating resident I feel confident in my ability to treat patients utilizing OMT in my future practice." – **Ashley Taliaferro, DO** (Madison Graduate)

State Highlights

Wisconsin is eminently livable, renowned for its cultural attractions, surrounded by unspoiled natural beauty, and often voted one of America's best places to live. The four-season climate affords unparalleled opportunities for outdoor recreation. Diverse cities ensure multicultural experiences and first-class arts venues. For more information, visit <http://www.travelwisconsin.com>.

Whether you are looking for a rural setting, an inner-city site or a city with a university, each location is yours to explore in this program. For details on each location, visit <http://www.fammed.wisc.edu/residency>.

"I feel like this program really prepares us to excel as full-spectrum osteopathic (and) family medicine physicians. I love that I have the freedom to use my osteopathic skills nearly every day, and get to practice with and learn from such amazing colleagues and faculty members. I can't imagine being happier anywhere else." – **Taryn Lawler, DO** (Madison graduate)
